

Mpls., Jan. 8/55 -

Dear Mother and Father,

I'm sending the U/L's official publication which will give you some idea of the University of Life activities. The young people put out the paper themselves, and you may notice that their proof-reading leaves a good deal to be desired. Some

announcements are deliberately <sup>to</sup> slangy in order to "go over big" with the intended readers.

Wilford is getting stronger all the time; this will be his third day, I believe, for him to get outdoors for a few minutes. The boys are well, too. Robert gets in some hockey (or more likely just skating practice) after school quite often. He attends basket-ball and hockey games frequently, because he has a season ticket for the inter-High School games.

I told you about my internal upset. Well, I have taken a whole bunch of tests and X-rays and only one was much off normal

so far. I apparently  
have something not  
quite <sup>right</sup> with my liver  
and that is what  
has been giving me  
tummy-aches. I now  
can sympathize with  
Father and all the in-  
digestion miseries he  
has had from time to  
time. I'm in hospital  
now for more tests and  
better rest. Wilford and  
Miss Dietzen are  
running the house very  
nicely between them. W.  
can't visit so sent me a LOVELY  
cyclamen. R. & J. have been in

more news later,  
Love, Catherine
